About Us

FinTech System is a software development company focused on building custom fintech solutions for traders, brokers and financial businesses. We develop secure, scalable and user-friendly platforms tailored to each client's requirements - from a single trading terminal to a complete multi-user brokerage stack. We are a technology provider only: we build software, not brokerage or financial services.

Our Approach

We work closely with clients to understand their business needs and deliver software that improves efficiency, automation and user experience. Every engagement follows a clear path - discovery, design, agile development, testing, deployment and ongoing support - so you always know what is being built and why.

What We Build

- **Trading Platforms**
White-label, multi-asset web & mobile trading platforms with admin panels.
- **Algo & Automation**
Algo-trading engines, bots, signal systems and strategy automation.
- **TradingView & Pine Script**
Custom indicators, strategies and alert-to-broker webhook execution.
- **Core Trading Systems**
OMS, risk management, portfolio, fund management and analytics.
- **APIs & Integration**
Broker APIs, REST, WebSocket and custom third-party integrations.
- **Enterprise FinTech**
SaaS platforms, CRMs and mission-critical financial software.

Our Services - 40+ Capabilities

A complete catalog spanning eight practice areas. Each service is available individually or as part of a fully integrated build.

● Trading Platforms

Custom Trading Platform Development | Trading Admin Panel Development | Custom Trading Dashboard | Multi-User Trading Platform | White Label Trading Platform | Paper Trading Platform | Virtual Trading Platform

● Algo Trading & Automation

Algo Trading Software Development | Automated Trading Solutions | Strategy Automation | Custom Trading Bots | Signal Generation System | Signal Copy & Distribution System | AI-Powered Trading Tools

● Pine Script & TradingView

TradingView Pine Script Development | Pine Script Strategy Development | Pine Script Indicator Development | TradingView Alert & Webhook Integration

● Market Data & Charting

Live Market Data Integration | Real-Time Charting Solutions | Financial Data Processing

● Trading Systems & Modules

Order Management System (OMS) | Risk Management Module | Portfolio Management System | User & Fund Management | Reports & Analytics Dashboard

● APIs & Integration

Broker API Integration | REST API Development | WebSocket Integration | Custom API Development

● FinTech Software & SaaS

FinTech Software Development | SaaS Platform Development | CRM for Trading Businesses | Custom Web Application Development | Enterprise FinTech Solutions

● Infrastructure & Support

Cloud & VPS Deployment | Server Setup & Maintenance | Performance Optimization | Security & Authentication | Software Maintenance & Technical Support

Trading Platforms

- **Custom Trading Platform Development**
End-to-end multi-asset web & mobile trading platforms, built for your brand.
- **Trading Admin Panel Development**
Back-office & dealer panel for clients, funds, brokerage, risk and reports.
- **Custom Trading Dashboard**
Live watchlists, positions, P&L and charts in a fast, responsive UI.
- **Multi-User Trading Platform**
Broker/sub-broker hierarchy, sharing and per-user controls at scale.
- **White Label Trading Platform**
Fully branded, production-ready platform deployed under your name.
- **Paper Trading Platform**
Risk-free simulated trading with live data and virtual funds.
- **Virtual Trading Platform**
Gamified virtual markets with contests, rewards and analytics.

Algo Trading & Automation

- **Algo Trading Software Development**
Custom automated, rule-based trading systems with backtesting and risk.
- **Automated Trading Solutions**
Signal-to-execution automation with scheduling, monitoring and alerts.
- **Strategy Automation**
Turn discretionary or quant strategies into monitored live systems.
- **Custom Trading Bots**
Grid, DCA, arbitrage or bespoke bots for stocks, forex and crypto.
- **Signal Generation System**
Real-time market scanning that produces and publishes signals.
- **Signal Copy & Distribution System**
Mirror master trades to unlimited followers with per-user sizing.
- **AI-Powered Trading Tools**
Custom ML analytics, pattern detection and smart alerts.

Pine Script & TradingView

- **TradingView Pine Script Development**
Custom indicators, strategies and screeners coded in Pine v5.
- **Pine Script Strategy Development**
Backtestable strategies with entries, exits, sizing and reports.
- **Pine Script Indicator Development**
Bespoke multi-timeframe indicators, overlays and screeners.
- **TradingView Alert & Webhook Integration**
Route Pine alerts to your broker/exchange for live execution.

Market Data & Charting

- **Live Market Data Integration**
NSE, BSE, MCX, forex and crypto feeds with normalization and failover.
- **Real-Time Charting Solutions**
Fast streaming charts with indicators and drawing tools, embeddable.
- **Financial Data Processing**
Ingestion, cleansing, time-series storage and analytics pipelines.

Trading Systems & Modules

- **Order Management System (OMS)**
Full order lifecycle, positions, margin, SL/TG and audit trail.
- **Risk Management Module**
Real-time exposure, leverage caps, auto square-off and blocks.
- **Portfolio Management System**
Holdings, allocation, valuation and performance analytics.
- **User & Fund Management**
Onboarding, KYC, wallet, approvals, limits and ledger.
- **Reports & Analytics Dashboard**
Turnover, P&L, brokerage and client metrics with export.

APIs & Integration

- **Broker API Integration**
Zerodha, Angel, Upstox, Dhan, Binance and more - data & execution.
- **REST API Development**
Secure, versioned, documented REST APIs built to scale.
- **WebSocket Integration**
Low-latency streaming with auto-reconnect and scalable fan-out.
- **Custom API Development**
Payments, KYC, messaging and data providers unified securely.

FinTech Software & SaaS

- **FinTech Software Development**
Secure, scalable trading, payments and financial applications.
- **SaaS Platform Development**
Multi-tenant SaaS with subscriptions, roles and analytics.
- **CRM for Trading Businesses**
Leads, KYC, follow-ups and WhatsApp, integrated with your platform.
- **Custom Web Application Development**
Fast, secure, responsive web apps with React and scalable back-ends.
- **Enterprise FinTech Solutions**
High-availability, compliance-ready systems for institutions.

Infrastructure & Support

- **Cloud & VPS Deployment**
AWS, GCP, DigitalOcean or VPS with CI/CD, SSL and backups.
- **Server Setup & Maintenance**
Linux, Nginx, database tuning, monitoring and updates.
- **Performance Optimization**
Query tuning, caching, latency and load-test hardening.
- **Security & Authentication**
2FA/OTP, session control, encryption and audit logging.
- **Software Maintenance & Technical Support**
Bug fixes, updates, monitoring and SLA-backed support.

Industries We Serve

- **Professional Traders**
Advanced tools, automation and analytics for serious individual traders.
- **Trading Communities**
Platforms, paper-trading and signal distribution to engage and grow audiences.
- **Brokers & Sub-Brokers**
White-label platforms with hierarchy, risk and back-office control.
- **FinTech Startups**
MVPs to production-grade SaaS, built fast and scalable.
- **Investment & Financial Firms**
Portfolio, reporting and enterprise-grade financial systems.

Why Choose Us

- **Custom-Built Solutions**
Tailored to your exact workflow - never a rigid template.
- **Secure & Scalable Architecture**
Financial-grade security and systems that grow with you.
- **Fast Development & Deployment**
Proven components mean quicker go-live and lower cost.
- **Ongoing Technical Support**
Maintenance, monitoring and enhancements with clear SLAs.

Our Engagement Process

- **1. Discovery**
We map your goals, users, markets and technical requirements.
- **2. Design & Architecture**
UX, data model and system architecture agreed up front.
- **3. Agile Development**
Built in iterations with regular demos and transparent progress.
- **4. Testing & QA**
Functional, security and load testing before every release.
- **5. Deployment**
Cloud/VPS setup, SSL, monitoring and a smooth go-live.
- **6. Support & Growth**
Maintenance, enhancements and scaling as your business grows.

Let's build it together
